Customer Reviews

I am very impressed with this book. Not only for the information withing the chapter exercises but with the ability to use your skills in labs and practice database to expand and really test your knowledge. It has a lot of problems even within the chapter work that goes beyond things that have

been covered. It has a color key for those things. So you really do have to think when using this book. It isn't just a step-by-step follow along without thinking and you will complete the chapter easily. You will know access if you go through this whole book.

The product description states there are 863 pages in the book. My instructor states there are over 800 pages. When I got the book there were slightly over 700 pages. Where are the other 163 pages? My instructor states there should be 12 chapters; the book only has 11 chapters. I checked the ISBN and they match. So what's up with that?

I like the way that the sections are placed. The step by step following the chapter makes learning Access very non-overwhelming. I have never used Access before this book and it's making this class easier than I would have thought it would be.

Exactly what I wanted. Easy to use.

Well designed for the beginner. Lots of exercises and an online testing resource.

The Kindle book is not compatible to Kindle for Windows 8 and Android

Excellent tutorial
